Stevenson WG, Stevenson LW, Middlekauf HR, et al. Improving survival for patients with atrial fibrillation and advanced heart failure. *J Am Coll Cardiol* 1996;28:1458-63. In this

article, the labels on the two curves in Figure 2A have been reversed. We regret the error and reproduce the correct figure, with its caption, below.

Figure 2. Survival of patients with and without atrial fibrillation according to time of initial evaluation: Group I (1985 to 1989, **panel A**) and Group II (1990 to April 1993, **panel B**). Group I patients with atrial fibrillation had worse survival than those without atrial fibrillation (0.39 vs. 0.55, $p = 0.002$). In Group II, the small difference in survival did not reach statistical significance (0.66 vs. 0.75, $p = 0.09$). Dashed curves indicate standard errors.
